**SUNBELT**  
RENTALS®

# Equipment that tells your story

Every great production begins with the right tools and the right people behind them. Sunbelt Rentals Film & TV supports storytellers with a full suite of equipment and experience designed for the unique demands of film, television, and content creation.

From prep to wrap, our technical teams work alongside you to deliver seamless, stress-free solutions, helping you focus on what matters most: creating remarkable stories.

# A legacy of expertise

In 2020, Sunbelt Rentals launched its dedicated Film & TV sector, marking a major step in our journey to support the UK's screen industries. Since then, we've brought together six of the most respected names in the business, uniting them under one banner and combining decades of on-set experience with a shared passion for production.

This move has transformed us into a true powerhouse for film and episodic TV production, with a team of more than 120 specialists working across the UK. With state-of-the-art camera, lighting, grip, and power solutions, we've helped bring countless stories to life, from big-screen blockbusters to independent features and everything in between.

Building on that success, 2024 saw our Film & TV group grow even further to include Broadcast TV, as well as Event and Exhibition production. Expanding our reach and reinforcing our position as one of the UK's leading providers of production solutions.

With a legacy built on innovation, expertise, and collaboration, Sunbelt Rentals Film & TV continues to back the creative industries delivering the equipment, knowledge, and support needed to turn bold ideas into reality.

# Sustainability

## Sustainability is at the heart of what we do.

We collaborate with industry leaders to raise environmental standards and hold ourselves accountable through trusted pledges and accreditations. Sunbelt Rentals Film & TV is proud to work with Albert, ISLA, and ESSA to make every production greener.

At Sunbelt Rentals Film & TV, we're committed to driving real, sustainable change across the film, TV, events, and exhibitions industries. From low carbon power solutions to reusable set-building materials, we help productions and live events reduce their carbon footprint—without compromising on performance.

We invest in energy-efficient technology, long-life equipment, and circular production solutions to support a sustainable future, while maintaining the quality, creativity, and efficiency that productions demand.

## HYBRID GEN TRUCK

Sunbelt Rentals is driving sustainable, high-performance solutions for the film, TV, events, and live production industries. A standout example is our Hybrid Gen Truck, developed in collaboration with the BBC for Silent Witness.

This 18-tonne vehicle combines a 154kW battery with a 100kVA HVO-fuelled generator, delivering up to 72kW of power while significantly reducing fuel use and carbon emissions.

It allows productions to run seamlessly without extra drivers or trucks, supporting efficient and environmentally responsible workflows.

Designed for silent operation, stable power, and flexibility, the Hybrid Gen Truck exemplifies Sunbelt Rentals' commitment to innovative, technology-driven sustainability. Alongside this, our Energy Management as a Service (EMaaS™) platform and adoption of solar, battery, and zero-emission equipment demonstrate measurable environmental impact without compromising performance.

# Camera & lens

Capture every frame, create every story.

Our team is dedicated to sourcing the widest range of digital and film cameras, lenses, and support equipment to realise every creative vision. We provide premium Super 35 and large-format cameras from SONY, ARRI, and RED, alongside world-class lenses including Hawk, Atlas, Cooke, Scorpio, Leica, Zeiss, ARRI Signature, Angénieux, and Fujinon.

Our collection also includes vintage anamorphics, rehoused lenses, and rare optics, offering truly bespoke cinematic solutions, all supported by our expert team and custom-tailored setups to meet the unique demands of any production.

# Film lighting

Light your vision, illuminate your story.

When it comes to lighting, our solutions shine brightest. We offer a comprehensive range from studio kits to location setups, including HMI, incandescent, and LED fixtures in every shape and size. Our inventory also includes green screens, extensive cabling, and all essential accessories.

We supply equipment from leading manufacturers such as ARRI, Astera, Creamsource, Kino Flo, LiteGear, Aladdin, Nanlux, Lightbridge, Dedolight, DOP Choice, and GrandMA, ensuring productions of any scale have the tools they need to light every scene perfectly.

Scan the QR code to view our film lighting equipment.

# Grip, crane & remote systems

Control the camera, command the scene.

We go further to help you capture the most memorable shots. From one of the largest ranges of grips, dollies, and telescopic cranes to jibs and remote heads, we provide the tools to move your camera—and your audience.

Our inventory includes the Super Techno 100R and the Scorpio 78, one of only a few in the UK. We also specialise in anti-vibration systems, shock absorbers, and dampers for all types of camera setups, ensuring smooth, precise motion for every production.

# Your vision, in virtual production

Through our partnership with Academy and Emmy award-winning visual effects teams, we are committed to bringing Virtual Production to life. We provide high-quality LED panels for extended reality walls and ceilings, allowing live action to be combined with digitally created environments rendered in real time.

This approach maximises creative control while minimising costs and carbon footprint, giving filmmakers the freedom to innovate sustainably.

# Your technical production partner

We seamlessly integrate our extensive inventory, experience, and technical expertise in LED Screens, Video Solutions, Lighting, Sound and Rigging to provide our clients with a dependable foundation for their creativity and production.

We can provide everything you need on set, on location, on time and on budget. From prep through to wrap, from audience entrance to the round of applause.

Scan the QR code to view our production partner services.

# Access platforms, when it matters most

We offer the largest fleet of sustainable plant and attachment equipment, designed to make every production task easier while reducing environmental impact.

Our range includes powered access machines, forklifts, tracked booms, scissor and spider lifts, and telehandlers, all engineered for safety and efficiency.

Scan the QR code to view our powered access equipment.

# Power solutions that keep you going

From road-towable generators (20–100kVA) to static generators up to 800kVA, we provide reliable power for productions of any scale. Multiple units can be synchronised to cover all your energy needs.

Our extensive range of cables, distribution boards, and battery storage units ensures seamless power delivery—keeping your set quiet when you call action and your crew charged when you call cut. We also supply small portable batteries, including Instagrid and Wattman, perfect for flexible, on-the-go power.

We provide heating, cooling, ventilation, and extraction solutions, from portable units to industrial chillers and boilers, ensuring every workspace, stage, or water tank stays at the right temperature.

## Partnerships: transforming the screen industries

At Sunbelt Rentals Film & TV, we know collaboration drives creativity. Our partnerships connect people, expertise, and technology to deliver real impact across film, television, broadcast, and live events.

We support the next generation of talent through skills programmes, hands-on workshops, and practical training—giving emerging filmmakers and crews the tools they need to succeed.

Sustainability is at the heart of what we do. In partnership with BAFTA albert and the Screen Alliance North Sustainability Working Group, we help productions reduce their environmental footprint and adopt low-carbon, efficient practices.

We champion inclusion and diversity through collaborations with Women in Film & Television (UK), Women Behind the Camera, Illuminatrix, Cine Certified, the Production Guild of GB, and more—ensuring opportunities are accessible to all.

From technical excellence to professional development, our partnerships set the standard for innovation, safety, and creativity—shaping a stronger, more connected, and forward-looking UK screen industry.

# Workshops & training: hands-on experience, real-world skills

Sunbelt Rentals Film & TV delivers hands-on, industry-led workshops that equip students, freelancers, and production crews with the skills to succeed in film, television, and live events.

Our Lighting & Camera, Grip & Rigging, and Power & Energy Management sessions provide practical experience with industry-standard equipment and workflows, often in collaboration with leading bodies such as the ACO, GBCT, and ScreenSkills.

Sustainability is at the heart of our training. In partnership with BAFTA albert and the Screen Alliance North Sustainability Working Group, we support crews in adopting low-emission technology, carbon tracking, and more sustainable production methods.

We also deliver accredited IPAF, FLT, and telehandler courses, plus bespoke skills pathways that bridge the gap between education and employment—empowering the next generation of creative professionals.

Empowering the next generation of creative professionals.

# Theatre suite & camera testing studio

A purpose-built camera testing facility designed for cinematographers and crew, featuring spacious prep rooms for multiple camera packages.

The facility includes a pre-lit test set designed by Dan Betteridge, complete with dressed environments, practical lighting, interchangeable backdrops, and an LED volume supporting extended reality workflows.

On-site support is available throughout, alongside a private 15-seat viewing theatre equipped with a DaVinci suite, 4K/8K projection, cinema-grade sound, and a dedicated VFX grid test room for efficient review and grading.

# West London rehearsal studio

Our Rehearsal Space offers the ideal environment for creativity and performance. Purpose-built for rehearsals, video shoots, and content creation, it's a versatile space designed to meet the needs of artists, production teams, and creative professionals.

Spacious and adaptable, the studio provides everything you need to focus, experiment, and bring your ideas to life—whether preparing for a live show, developing new material, or filming promotional content.
